Everlast Cleaning Non-Flammable Solvent

Product name: Everlast Drumbeaters

Product number: CP1131949

Special cleaning solvents Drumbeaters # CP1131949 that work with our Drum Washer System DW55 and DWC 400. You can mix CP1131949 with water upto 9 parts water 1 part cleaning solvent. This product cleans very aggressively when heated to 120F - 180F.

Drumbeaters # CP1131949 are super efficient in removing oil, dirt and grease from contaminated surfaces. Our Drumbeaters # CP1131949 can be used in a wide variety of applications, from general purpose hard surface cleaning to solving highly complex technical problems.

You can decant your wash solution and recover the residues from the bottom of the tank and remove all hydrocarbons and oils from the top and use the cleaning solvent over and over, you might lose about 5% of the solvent each time.

You can decant and dispose of the bottom sludge, residues, etc. and because you mix with water VOC's are not a problem when you are cleaning. As you can see when you take the dilution factors with water and have a life cycle of 20 changes, it is very cost competitive. It is also a very good parts washing solution.

CP1131949 will effectively remove:

- Resins
- Glues
- Tar
- Grease
- Polymers
- Paints
- Coatings
- Oil
- Silicones
- Asphalt

Features:

- Low toxicity
- Natural based terpene
- Rapid biodegradation
- Non-ozone depleting
- Non-carcinogenic
- None to very faint pine odor
- Flash point over 93C/200F
