Drum Crusher Model# DC5000-18 Gasoline

The Model DC5000-18 is for use in multiple or remote locations where the electrical supply is limited or unavailable. This system will crush a 55 gallon drum down to 4" in height greatly reducing storage space requirements and transport fees.

The unit comes with 18HP Gasoline Motor, hydraulic door safety switch, and an oil sight gauge with temperature indicator. Heavy duty construction, all structural components are made with heavy steel plate.

Standard Features:

- 18hp gasoline motor (Honda motor)
- Compaction force 60,000 pounds at 3000 psi
- Crush 55 gallon steel drum down to 4"
- Cycle time of 25 seconds
- 40 gallon hydraulic tank
- Heavy Duty Steel construction
- Directional Control Valve
- Drum ring locator, keep the drum aligned
- Safety interlocks door, prevent operation while door is open
- Portability with Fork Lift Truck
- 12 Volt Battery (Included)
- Safety features to comply with OSHA

Additional Options:

Drip Pan for Liquid Containment	Under the crushing chamber to collect any fluids inadvertently not removed prior to crushing the drum
One step control valve	Causes the equipment to go through a full cycle without holding the lever down through the entire crushing cycle

Standard dimensions:

H: 100" W: 36" D: 60" Weight: 2,000 lbs

Shipping dimensions:

H: 75" W: 40" D: 65" Weight: 2,500 lbs

We sell directly from Elburn IL, USA
