

Drum Crusher Model# DC7000-10

The DC7000 is the best drum crusher on the market today. It is used to crush a large volume of drums continuously. The DC7000 has all the options in a drum crusher that you will need or find. The DC7000 can and will meet all your needs including drum packing, air filtration, explosion proof, one touch operation, and much more. The DC7000 is the result of the past 25 years of being in the drum recycling/disposal business. The DC7000 is a dual purpose machine. It can be used to compact waste inside of the drum or to crush the empty drum itself. The Model DC7000 will crush a 55 gallon drum down to 3" in height greatly reducing storage space requirements and transport fees. The unit comes complete with fused electrical controls, hydraulic door safety switch, and an oil sight gauge with temperature indicator. Heavy duty construction, all structural components are made with steel.

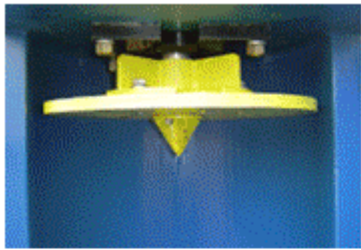

Standard Features:

- 10hp electric motor
- Crushing force up to 85,000 pounds at 3000 psi
- Crush 55 gallon steel drum down to 3"
- Piercing point on the crushing plate
- 40 gallon hydraulic tank
- Fluid collection reservoir 4.5 gallons under the chamber
- Cycle time: 25-30 seconds
- Automatic Push Lever crushing control
- Drum ring locator keep the drum aligned
- Compacting inside of drums using a second plate and 15" clear chamber
- Safety interlocks door, prevent operation while door is open
- Emergency stop push button and motor starter
- Portability with Fork Lift Truck
- Electrical control box NEMA- 12
- Safety features to comply with OSHA

Additional Options:

Explosion Proof System	When you have a hazardous area
Chamber for 85 gallon drum	Chamber enlarged for crushing 85 gallon drum
Dutch Door	This is a door that can open from the top and remain closed on the bottom for packing purposes
Fluid collection reservoir 30 gallons	Under the crushing chamber to collect any fluids inadvertently not removed prior to crushing the drum
Automatic drum ejection system	For ejecting the crushed drum out of the chamber
Automatic drum conveyor system	For moving the crushed drums to a dumpster or external container
Vent Fan	Heavy-duty Vents Fan. Custom & Std. sizes available
Hepa Filter	This type of air filter can remove at least 99.97% of airborne particles 0.3 micrometers (µm) in diameter.
Galvanized Finish	Protective coating of zinc to provide corrosion resistance

Piercing point on the crushing plate to allow the compressed air inside of the drum to escape as drum is being crushed.

Drum locator ring keeps drums centered in chamber

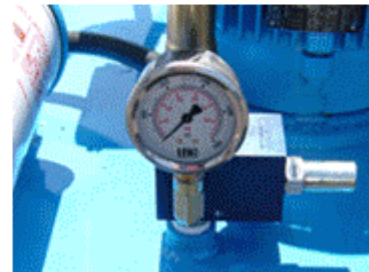

Electrical control box NEMA- 12 Key lockout, Emergency stop push button. Dust, oil and rain prevent with occasional wash down.

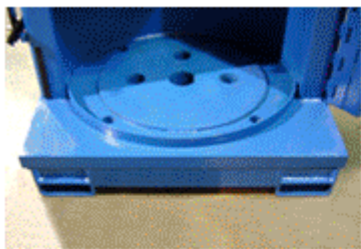

Automatic Push Lever

40 gallon oil reservoir

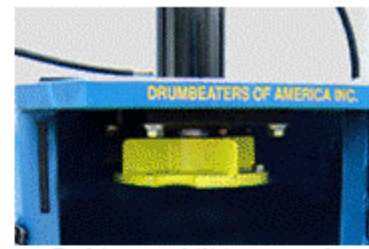

Hydraulic Pressure Gauge

Fluid collection reservoir 4.5 gallons and Portability with Fork Lift Truck

Hydraulic Door Safety Valve

Packing capabilities, second compaction head quickly converts drum crusher to drum packing

Explosion Proof Box (Optional)

Dutch Door (Optional)

Chamber enlarged for 85 gallon drum (Optional)
