

## Drum Washer Model JLP-100

The JLP-100 is a high pressure low volume drum washer. It is designed to wash and rinse the interior of drums and garbage cans sized up to 110 gallons using water, detergent, solvent, or hot water.

This system uses a high speed rotary nozzle for washing 100% the interior of drums and containers. The construction is heavy duty.

The wash station has a control box containing a start and stop button and an emergency stop button. The washing station is protected by a safety system to prevent the operator from activating a station when a garbage can is removed prior to the wash cycle being finished.

The JLP-100 is good for open top drums or trash cans. In combination with the utility of our high-pressure rotary wash nozzle, the JLP-100 is guaranteed to fully wash 360° of your container's surface area.

Designed, developed and assembled in the USA: All parts and components that go into the equipment are designed and developed meeting all American standards.

## Advantages

- High pressure low volume drum washer
- Wash open top drums or trash cans
- Eliminates virus and bacterias if using sanitizer or soap solution
- Eliminates Rodent and Insect Infestation
- Reduce Risk of Cross Contamination
- Protects Against Health Hazards
- Remove Odors and Improve Hygiene Standards

## Specifications

- Electrical Requirements: 120v (other options available upon request)
- Controls: Control panel containing a start and stop button and an emergency stop button
- Construction: 304 Stainless steel frame and collection reservoir

## Helping Our Environment

Drumbeaters of America specializes in the engineering and manufacturing of systems for industrial companies to reduce the volume of waste products generated in manufacturing and to transform the waste products so they can be recycled.

## Improving Quality

Drumbeaters is staffed with mechanical and electrical engineers with international standards experience. Our final assembly is performed at the Drumbeaters of America facility located in Elburn, Illinois, USA.

## Industry Standards

Our clients include Fortune 500 manufacturers, U.S. military installations, governmental agencies, global companies and waste remediation contractors. Our equipment and systems have been shipped worldwide.
